## Oakdale Resources could have more graphite in South Australia

Oakdale Resources'(ASX:OAR) graphite prospect in the Eyre Peninsula, South Australia, appears to be wider than that intersected in the limited coverage of previous drilling.

This follows interpretation of gradient array induced polarisation and previous transient electromagnetic surveys at the Oakdale prospect by Blue Sky Geoscience.

It noted that this could potentially be up to 800 metres wide in the northern third of the IP survey area.

Blue Sky has recommended an initial drill traverse 400 metres wide to test this interpretation.

A drilling program is poised to begin next week to collect in-situ metallurgical samples for further testing.
