

Edna Beryl with the remaining 1700 metres testing the Susan and Retsina prospects.

This extensional drill campaign at Edna Beryl aims to extend the shallow high-grade gold.

Susan has excellent potential for both gold in the oxide and primary zones down plunge from historical drill holes, which intersected:

- 9 metres at 9.12 g/t gold;
- 11 metres at 19.5 g/t gold; and
- 10 metres at 14.3g/t gold.

Analysis

The commencement of Emmerson's third drill program for 2016 ensures exploration news flow will continue from the Edna Beryl gold project which has produced significant high grade gold results to date.

A revised geological interpretation based on this drilling indicates potential for further bonanza gold grades in this round of drilling.

Drill results to date suggest that a much larger system exists in the area of the Edna Beryl mine.

Furthermore, the successful grant of the Exploration Mine Management Plan at Edna Beryl East allows for development of the first small mine transitioning Emmerson into a gold producer.

Emmerson holds 2,500 square kilometres of ground in the TCMF, owns the only gold mill in the region and holds a substantial geological database plus extensive infrastructure and equipment.

The company is up 260% year to date, currently trading at \$0.135.

Proactive Investors Australia is the market leader in producing news, articles and research reports on ASX emerging companies with distribution in Australia, UK, North America and Hong Kong / China.

Proactive Investors facilitate the largest global investor network across 4 continents in 4 languages. With a team of analysts journalists & professional investors Proactive produce independent coverage on 1000's of companies across every sector for private investors, private client brokers, fund managers and international investor communities.
