Mila Resources PLC 'keeping its eye on lesser known and loved commodities'

Mila Resources PLC Executive Director George Donne caught up with Proactive Investors and spoke about the direction they're keen to take the company in and where future value could be found.

He said: "Our goal is quite simple - we want to build Mila into an established and profitable natural resources focused company. Specifically we are looking to target investments where we believe that a certain amount of value has been demonstrated but they haven't yet achieved certain technical milestones which might allow them to access slightly deeper pools of capital and unlock some of the innate value. We've put Mila together very much based on a measured balance between the small cap investment experience, but also some very very significant mining sector expertise with our advisory committee."

Asked whether he's looking at any particular resource, he said: "We're very interested in looking at commodities which are perhaps lesser-known or lesser-loved at the moment ... there are some hidden gems out there which we think could be very interesting and very valuable for our investors".

Company Synopsis:

Mila Resources is aiming to capitalise on the current economic environment to acquire projects in the natural resources sector, which the Board believes have significant innate value that can be unlocked with minimal capital injection.
