Emmerson Resources intersects high-grade gold at Mauritania greenfields discovery in NT

Emmerson Resources Limited (ASX:ERM) managing director Rob Bills updates Proactive Investors on the explorer's first diamond drill program at its greenfields discovery Mauritania in the Northern Territory. The first hole drilled revealed high-grade gold mineralisation, intersecting 15 metres at 45 g/t gold, including 4 metres at 158 g/t gold. "It's incredibly high-grade - to put listener's on scale, the normal gold grade is between one and two grams," says Bills. Bills also explains the royalty-focused business behind Emmerson, which reduces the downside risk to its shareholders.
