## Proactive weekly oil and gas highlights: Zephyr Energy, Touchstone Exploration, Union Jack Oil, Mosman, Prospec, Aminex, ADM Energy

Zephyr Energy PLC (LON:ZPHR) this week unveiled the results of an oversubscribed share placing that it said will fully finance its maximum funding obligations for drilling the State 16-2 dual-use well at its acreage in the Paradox Basin in Utah.

The AIM-listed oil and gas firm said the placing of around 409mln new shares at a price of 0.55p each, a 24% discount to its Thursday closing price, has raised £2.25mln and has been conducted with a range of new, existing and institutional investors.

Touchstone Exploration Inc (LON:TXP, TSE:TXP) announced a significant gas discovery at the Chinook-1 exploration well in Trinidad.

Chinook-1 was drilled down to 10,039 feet and has encountered some 589 feet of net gas pay across three sections in the Herrera sands, and also saw 20 feet separately in the shallower Cruse formation, the group said.

Union Jack Oil PLC (LON:UJO) agreed to acquire an additional 30% interest in the North Kelsey project, taking its stake in the exploration project to 50%. It is acquiring the stake from Egdon Resources with a £100,000 payment in cash.

Additionally, the deal includes an agreement to cancel the disproportionate funding obligation attached to Union Jack's original 20% interest in North Kelsey, stipulated in a prior farm-in deal between the two UK oil firms.

All further financial obligations at North Kelsey will be carried equally, in line with their respective 50% stakes in the project.

Mosman Oil and Gas Limited (LON:MSMN) told investors that wiring logs from the Falcon-1 well at the Champion project in east Texas indicate good porosity and hydrocarbons. The data points to hydrocarbons in the primary and secondary Frio sandstone target zones which are interbedded with shale between circa 7,100 to 7,550 feet.

"The primary zone is circa 90 feet thick," the company said in a statement. "The mud logs also showed hydrocarbons in these zones with an increase in mud gas readings from a background of circa 30 units to over 3000 units in the primary zone."

Mosman noted that casing will be run and testing is due to take place once the drill rig has been released from the site.

Prospec Energy PLC (LON:PXEN) shares advanced on Wednesday as the company announced a deal to sell its Romanian subsidiary to H2Oil Limited.

The PXOG Massey business, which holds a 50% stake in economic rights for the EIV-1 Suceava Concession as its

sole asset, will be sold to H2Oil in return for £215,000 of cash to cover debt owed to the company and a nominal consideration for the company's shares in the business. It comes in the wake of a strategic review by the Prospex board through which the company decided to focus on late stage European onshore gas projects.

Aminex PLC (LON:AEX) shares soared on Monday as its farm-out deal for the Ruvuma gas project landed long awaited approval from the Tanzanian government. The company told investors that it now anticipates completion of the transaction within the next few days.

"We are delighted to finally receive government approval of the farm-out and would like to thank all agencies of the Tanzanian Government that were involved in the process," said Robert Ambrose, Aminex chief executive.

ADM Energy PLC (LON:ADME) said that the Aje field, in Nigeria, has now seen its fourteenth lifting of crude, marking the first sales since they were suspended at the onset of the pandemic. Earlier this year, the Aje field's operator decided to pause oil sales and store production in order to sell the barrels later at better prices. It meant that the scheduled March lifting was skipped.

Now, some 557,091 barrels of crude - of which ADM's share amounts to 33,056 barrels - have been lifted.
